Analysis: Closed and Settler Corridors

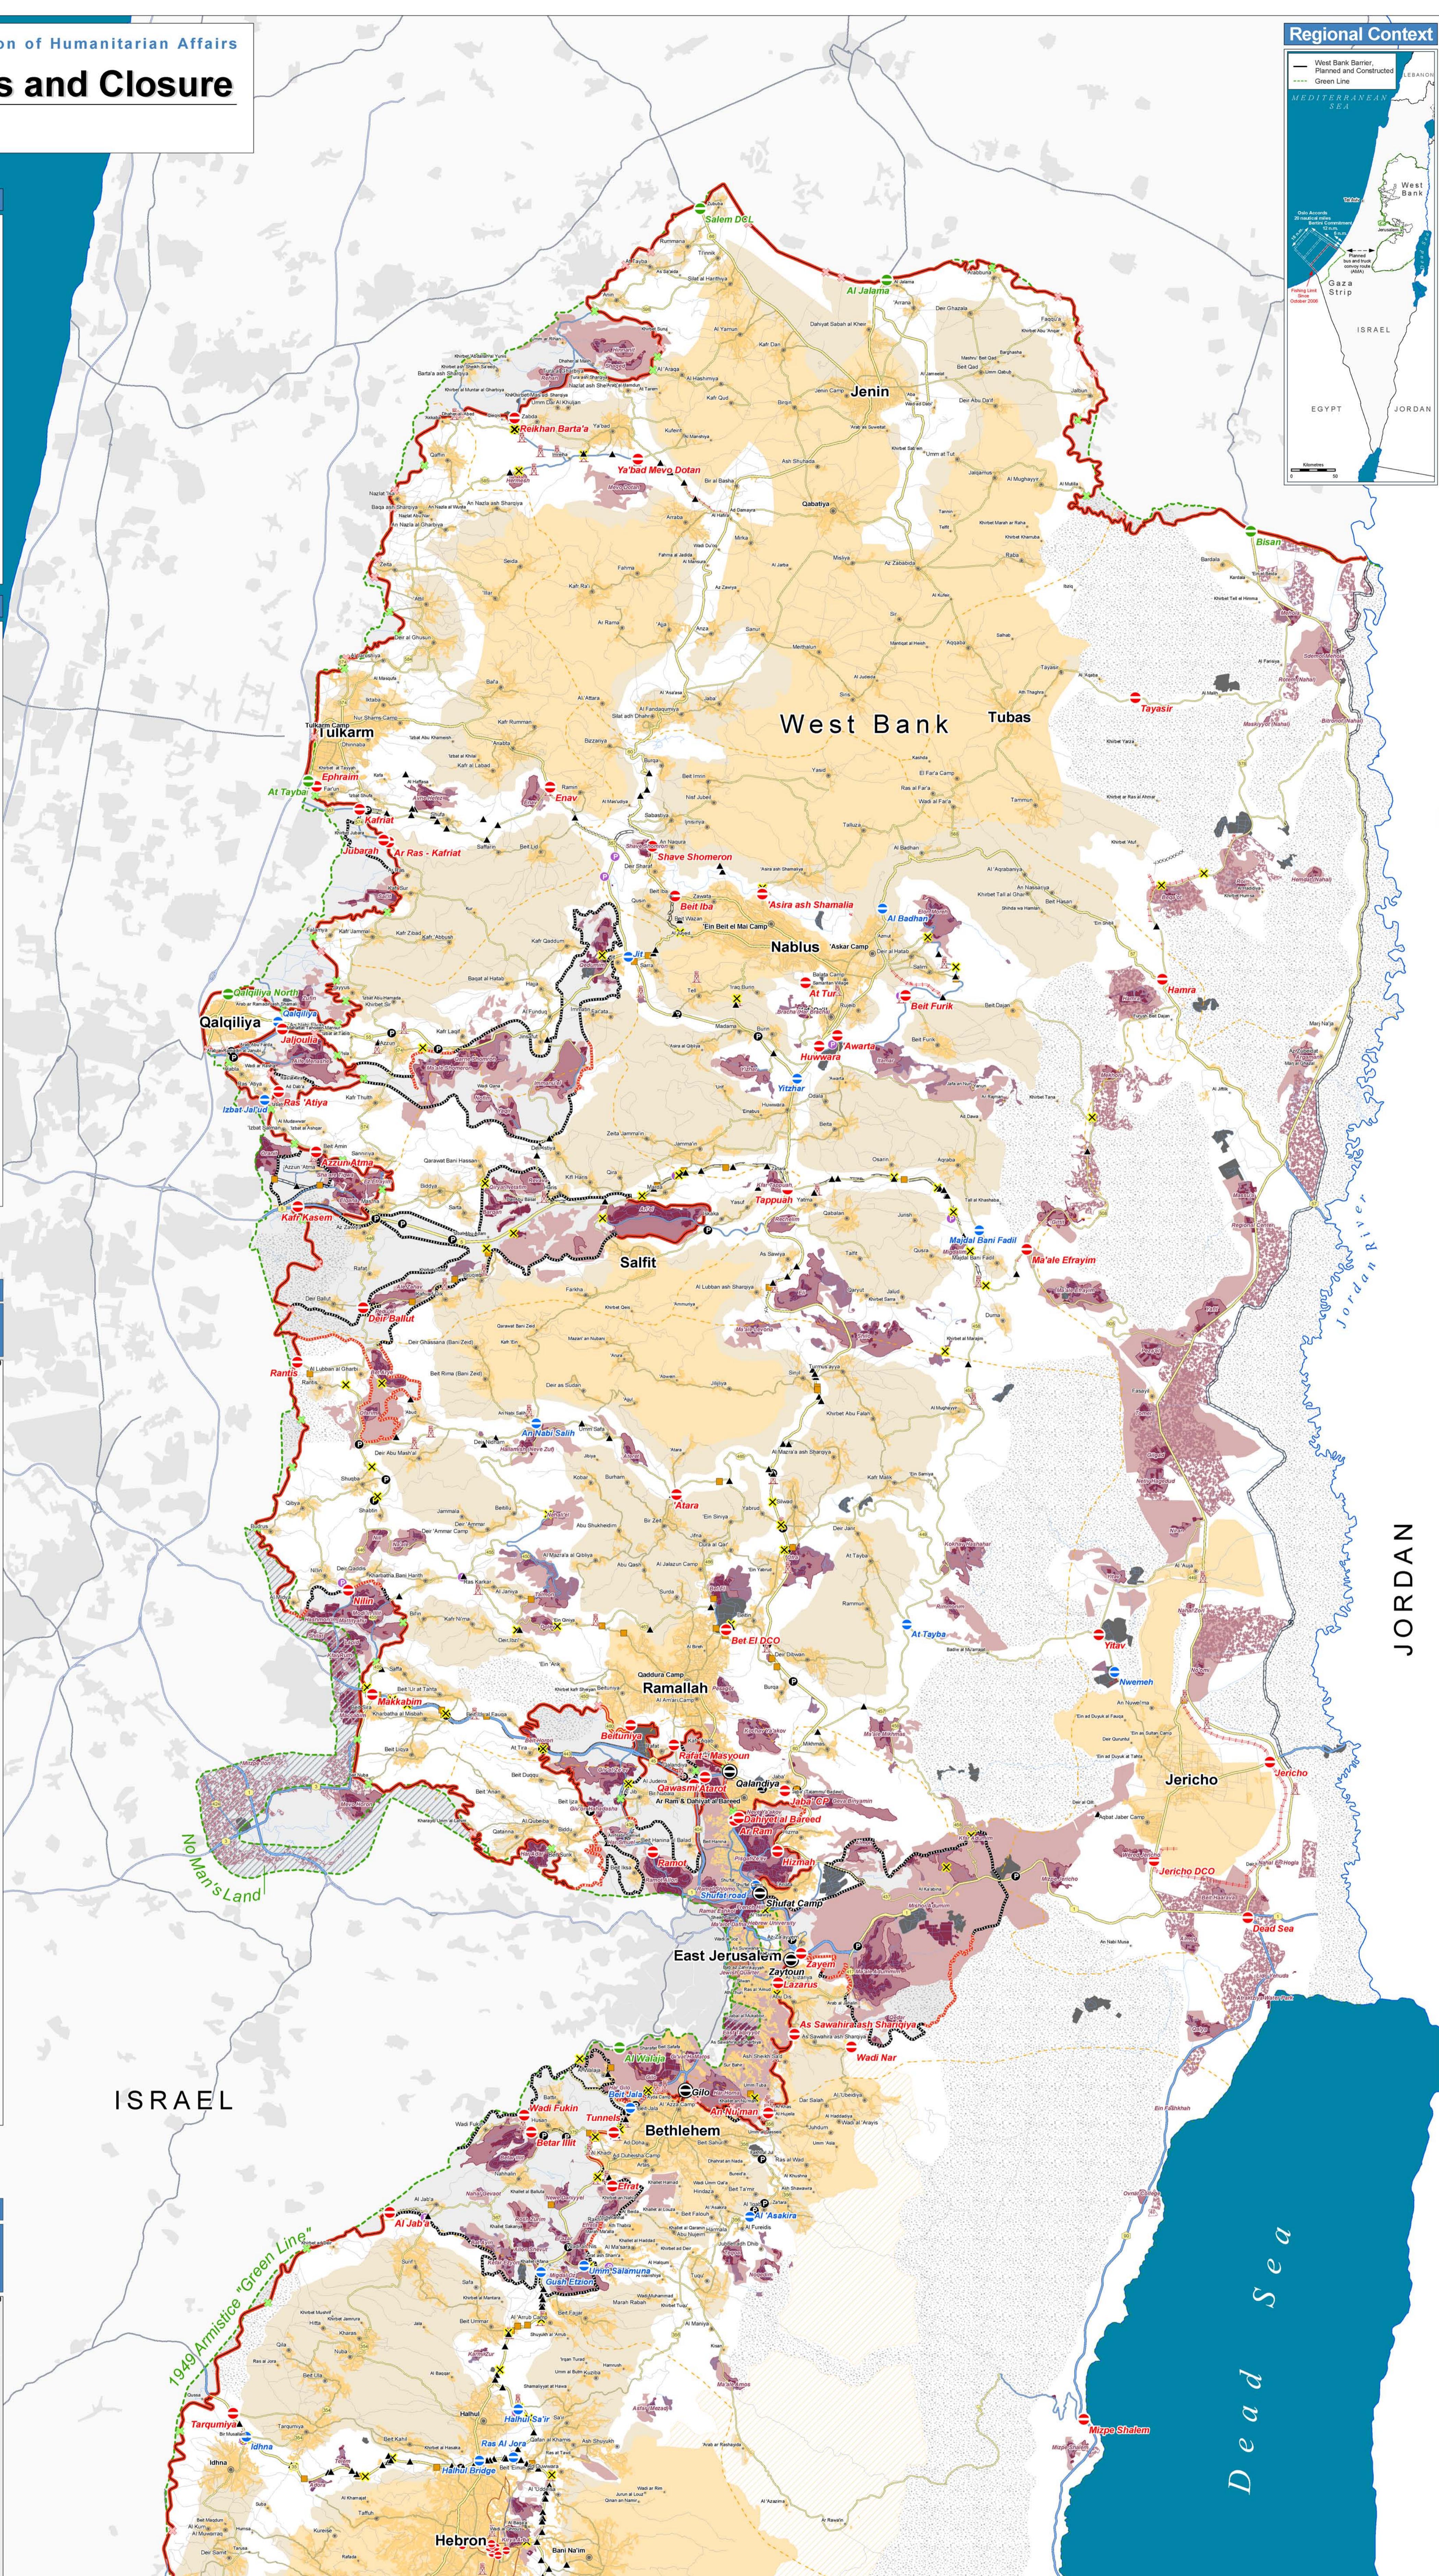

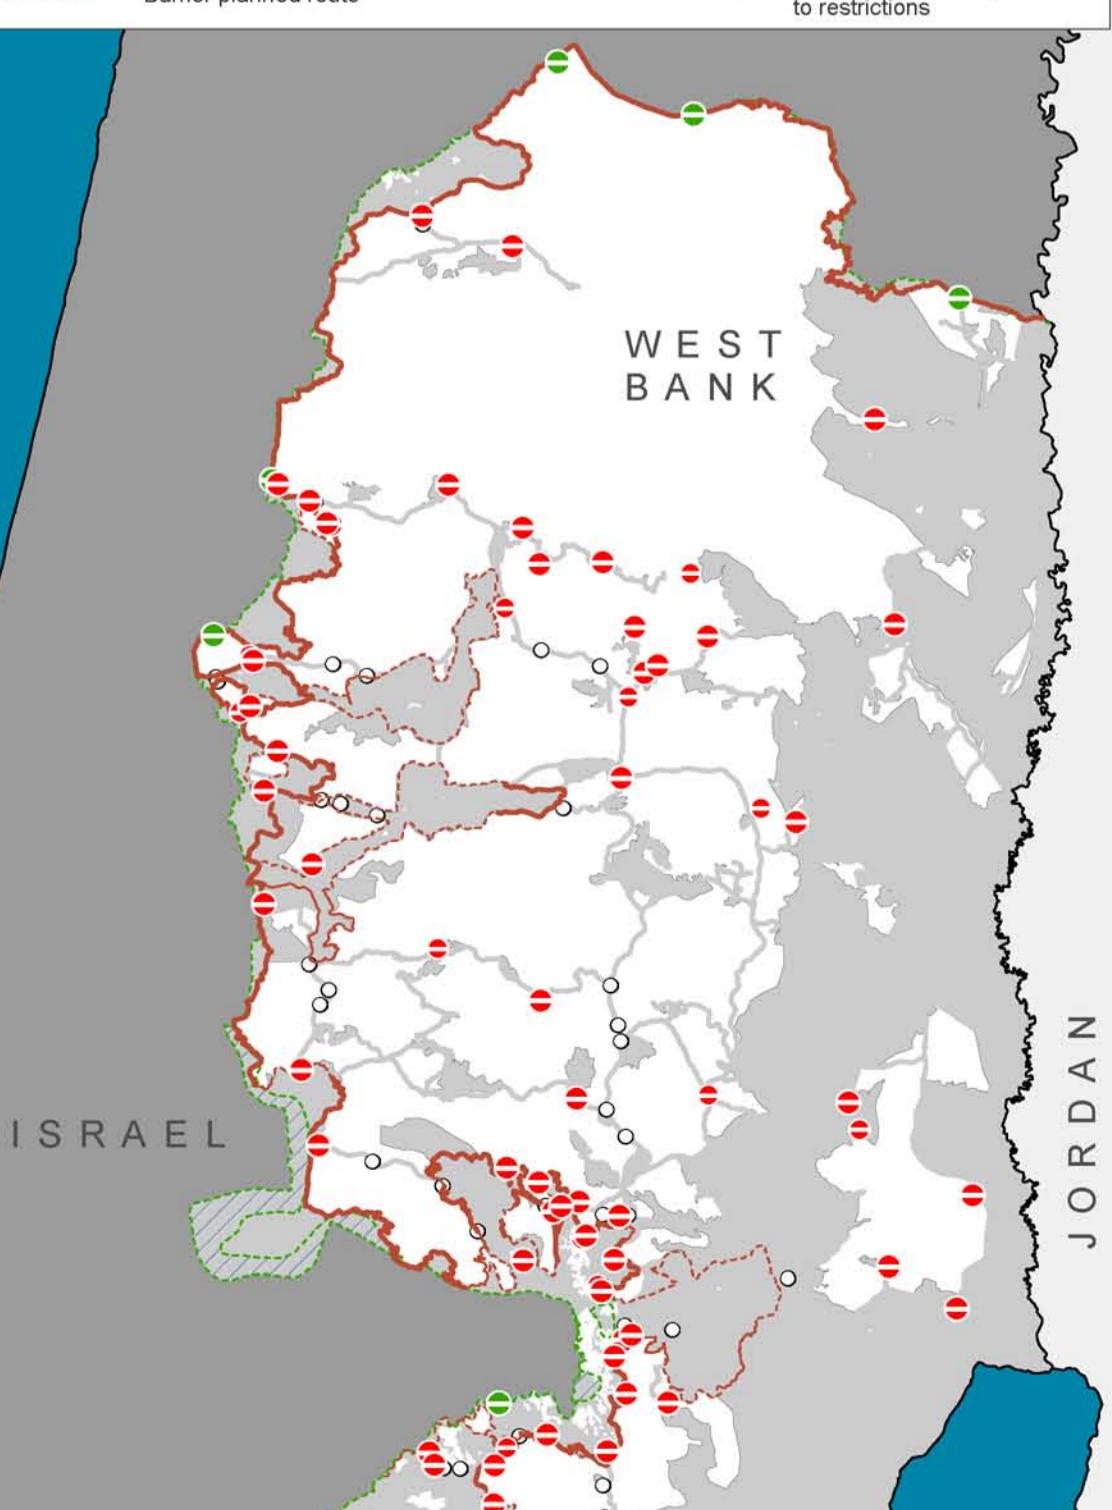

The majority of roadblocks (see main map) prevent Palestinian access on to primary roads in the West Bank. Effectively these roads serve as corridors for Israeli settlers commuting to and from Israel.

- (---) Barrier under construction in November 2007
- (---) Barrier planned route
- (—) Barriers to movement - The alignment of closures
- (—) Roads subject to restrictions
- (—) Areas inaccessible to Palestinians or subject to restrictions

**Fragmentation of the West Bank**

Israeli settlements, roads primarily for settler use, closed military zones and other measures fragment the West Bank. Checkpoints, underpasses and permits regulate much of Palestinian movement.

The West Bank Barrier

A complex series of concrete walls, electronic fences, observation towers, used to control Palestinian and vehicular movement.

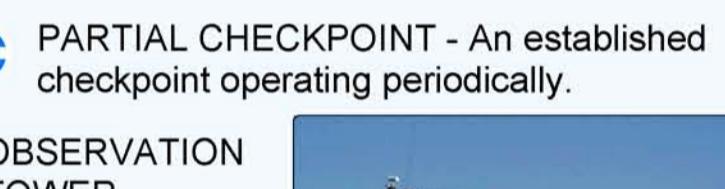

BARRIER GATE - Allows restricted movement through the West Bank Barrier to Palestinian lands and to Israel. Permits are required for Palestinians to pass through a gate.

Closure

A policy of physical barriers and permit requirements used to control Palestinian pedestrian and vehicular movement.

CHECKPOINT - A barrier manned by IDF and/or Border Police with observation towers and other physical blocks used to control pedestrian and vehicular access.

PARTIAL CHECKPOINT - An established checkpoint operating periodically.

OBSERVATION TOWER - An elevated military tower to monitor/control Palestinian pedestrian and vehicular access.

EARTH MOUND - A mound of rubble, dirt and/or rocks used to obstruct vehicle access.

TUNNEL - An underpass beneath roads that are primarily for settler use.

ROADBLOCK - A series of 1 metre concrete blocks used to obstruct vehicle access.

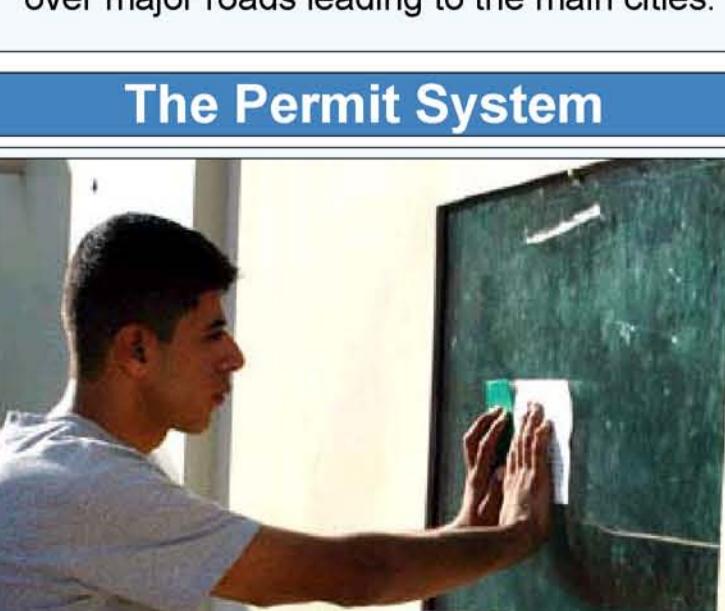

TRENCH - A ditch used to prevent vehicle crossing.

ROAD GATE - A metal gate, often manned by IDF, used to control movement along roads.

ROAD BARRIER - Secures the passage of Israeli settlers on restricted roads. These fences impede Palestinians from traveling over major roads leading to the main cities.

The Permit System

The permit system is complex and applied differently from region to region. A permit eases travel and reduces the risk of being turned back at a checkpoint. Permits are necessary for crossing specific checkpoints, accessing the Jordan Valley, the 'closed area' between the Green Line and the Barrier and for entering East Jerusalem.
